

Revolutionize Your Hotel's Online Presence

A comprehensive channel manager solution designed for Pakistan's hospitality market

The Challenge Facing Pakistani Hotels

Fragmented Distribution

Managing multiple OTAs separately creates operational chaos and booking errors.

Time-Consuming Updates

Changing rates and availability across platforms takes hours instead of minutes.

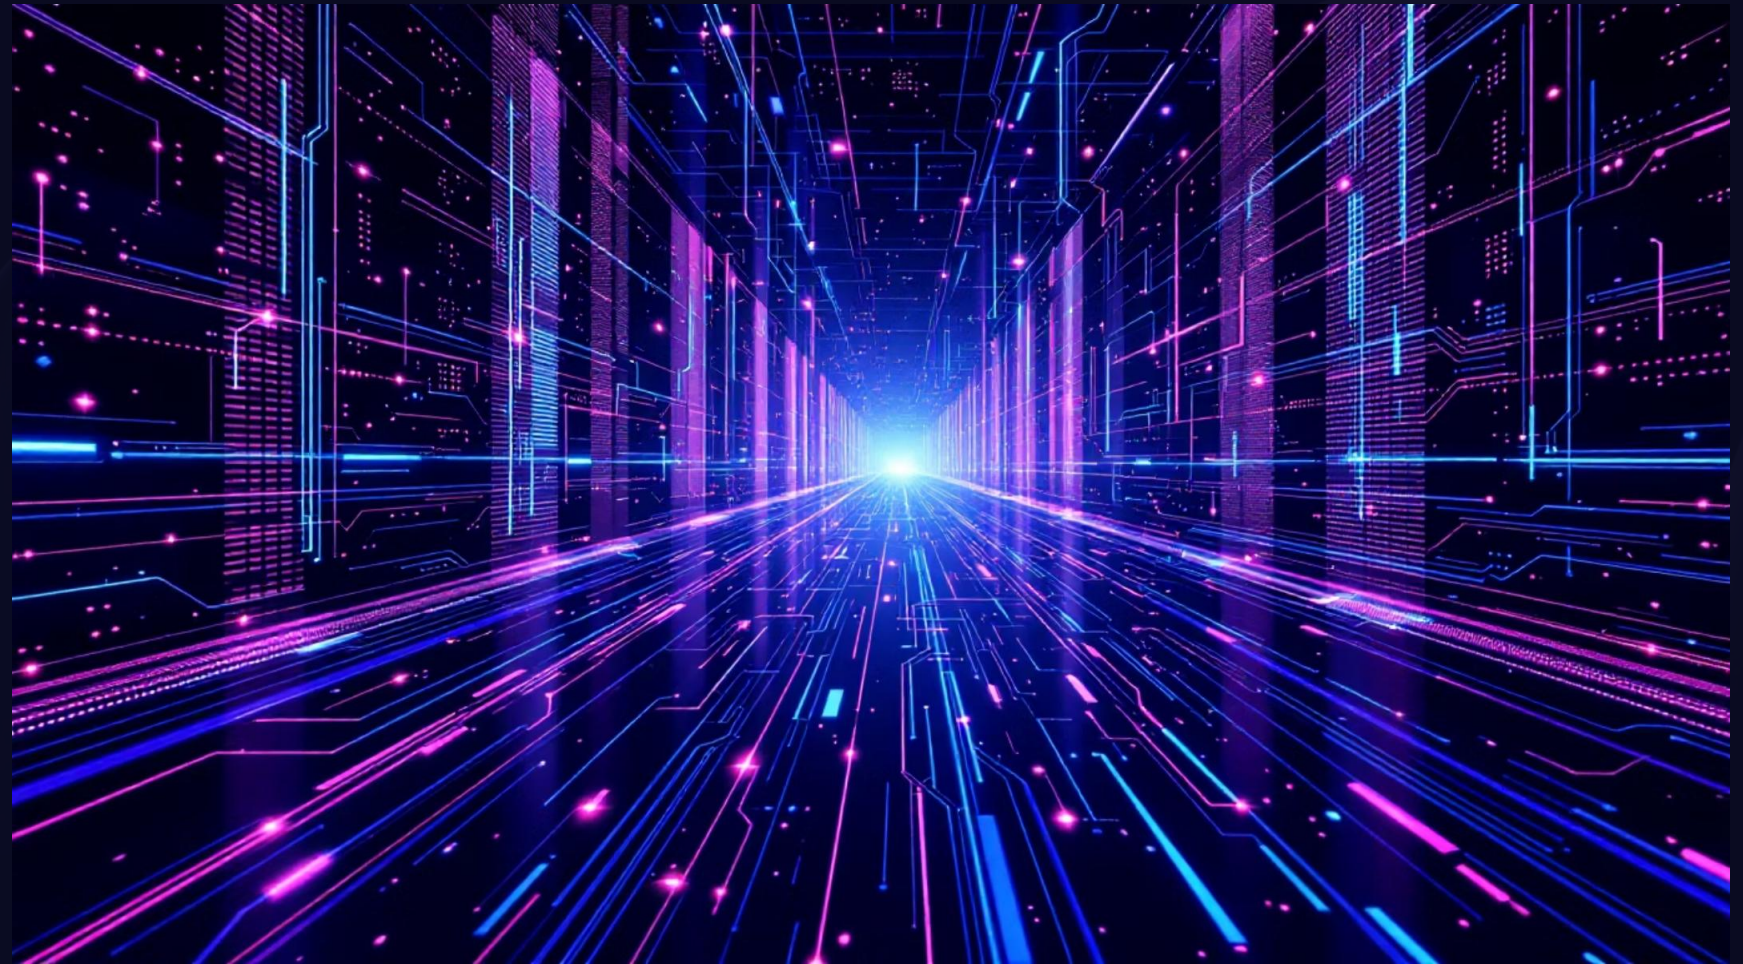

Overbooking Risk

Manual updates lead to double bookings and frustrated guests.

What is a Channel Manager?

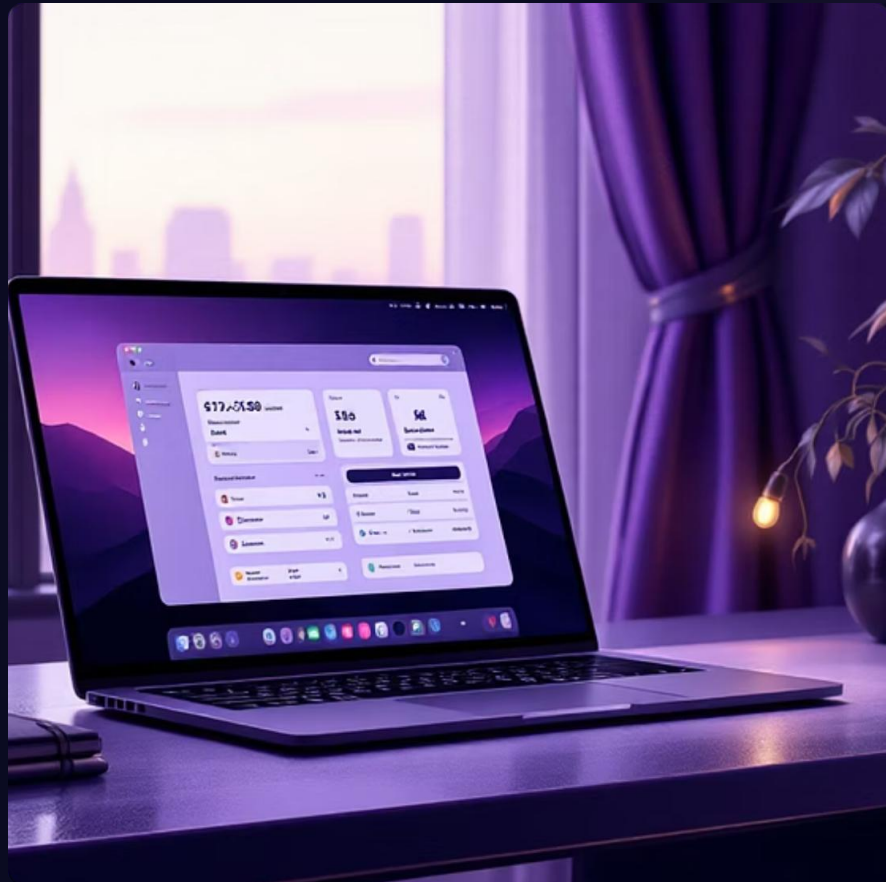

A channel manager is a centralized platform that connects your hotel's property management system (PMS) with multiple online travel agencies (OTAs), meta-search engines, and booking platforms. It automatically synchronizes room availability, rates, and inventory in real-time across all channels.

Think of it as the central nervous system of your hotel's online distribution strategy.

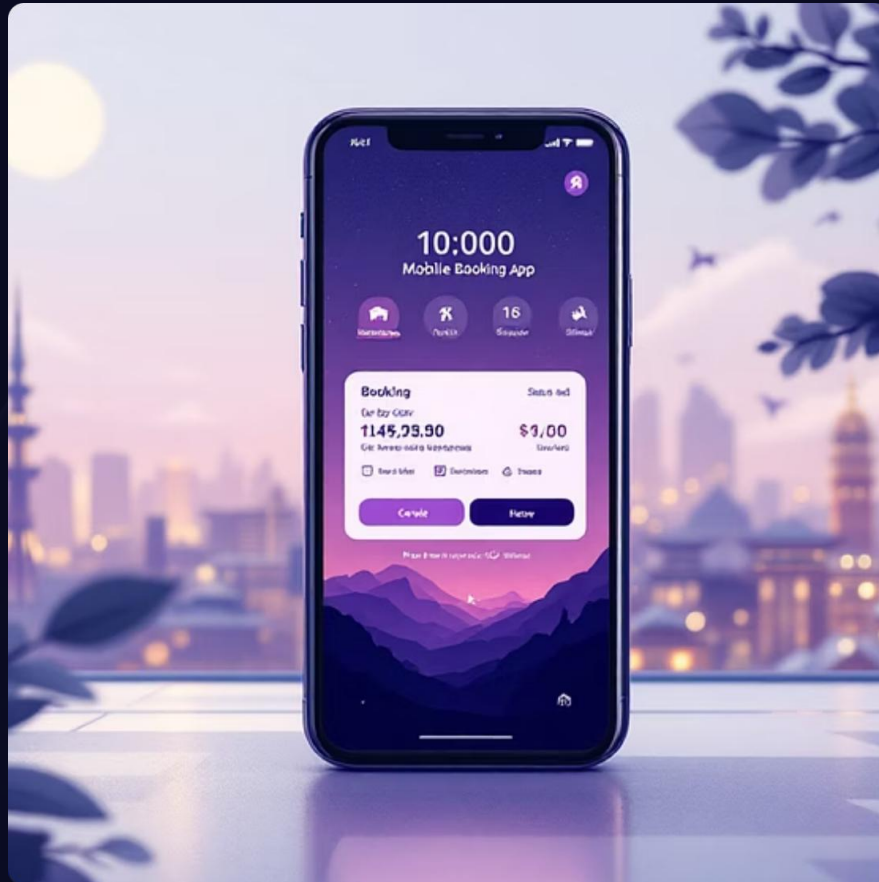

One Platform, Complete Control

Manage all your distribution channels from a single dashboard

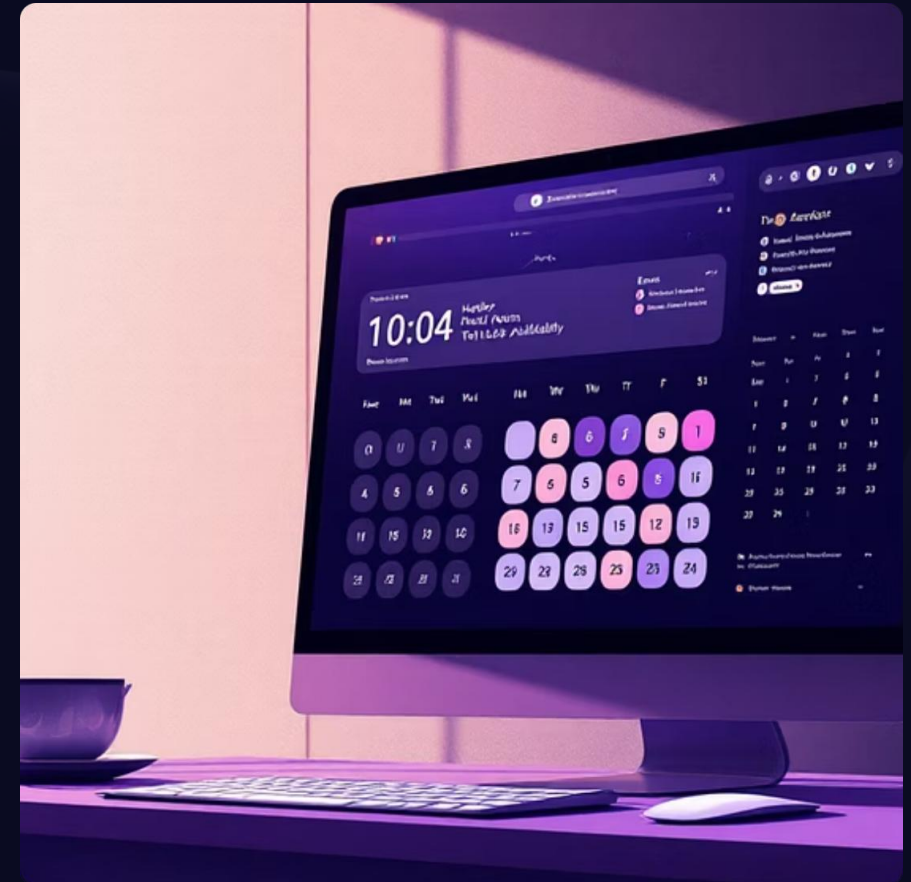

OTA Integration

Connect with Booking.com, Agoda, MakeMyTrip, and 1000+ channels

Meta-Search Engines

Appear on Google Hotels, Trivago and TripAdvisor

Direct Booking Engine

Synchronize your own website bookings seamlessly

Key Features That Drive Results

1

Real-Time Inventory Sync

Update room availability across all platforms instantly. No more overbookings or manual errors.

2

Dynamic Rate Management

Adjust pricing based on demand, seasonality, and competition with automated rules.

3

Automated Booking Updates

New reservations flow directly to your PMS without manual intervention.

4

Centralized Dashboard

Monitor performance, occupancy rates, and revenue from one intuitive interface.

Review Management Made Easy

Monitor & Respond

Track reviews from all platforms in one place. Respond quickly to guest feedback on Booking.com, Google, and TripAdvisor.

Improve Your Score

Address negative reviews promptly and showcase positive feedback. Build your reputation with consistent monitoring.
